

## **Amendments to the Claims:**

This listing of claims will replace all prior versions and listings of claims in the application:

### **Listing of Claims:**

1. (Currently Amended) A vehicle mounted peripheral device station, comprising:
  - a. a vehicle seat adapted to receive a removable headrest;
  - b. a peripheral device;
  - c. an adaptor for securing said peripheral device to said vehicle seat; and
  - d. ~~[[a securing]]~~ means for securing said peripheral device to said adaptor.
2. (Currently Amended) The vehicle mounted peripheral device station of claim 1, further including a support surface attached to ~~[[said peripheral device and]]~~ said adaptor for receiving said peripheral device.
3. (Previously Presented) The vehicle mounted peripheral device station of claim 2, wherein said support surface is a plate having a plurality of edges.
4. (Previously Presented) The vehicle mounted peripheral device station of claim 3, further including a plurality of side walls attached to said plurality of edges.
5. (Previously Presented) The vehicle mounted peripheral device station of claim 4, wherein said plurality of side walls are spaced to frictionally receive said peripheral device.
6. (Previously Presented) The vehicle mounted peripheral device station of claim 4, wherein at least one of said plurality of side walls is noncontinuous.

7. (Previously Presented) The vehicle mounted peripheral device station of claim 4, wherein said plurality of side walls includes a front wall, a first side wall, a second side wall, and a back wall.

8. (Previously Presented) The vehicle mounted peripheral device station of claim 7, wherein said front wall has a reduced height.

9. (Previously Presented) The vehicle mounted peripheral device station of claim 7, wherein said back wall is noncontinuous.

10. (Previously Cancelled)

11. (Previously Presented) The vehicle mounted peripheral device station of claim 1, wherein the securing means is taken from the group including hook and loop fasteners, straps, adhesives or combinations of one or more of these.

12. (Previously Presented) The vehicle mounted peripheral device station of claim 1, wherein said vehicle seat includes at least one receptacle to receive a post.

13. (Previously Presented) The vehicle mounted peripheral device station of claim 12, wherein said vehicle seat includes a second receptacle to receive a second post.

14. (Previously Presented) The vehicle mounted peripheral device station of claim 1, wherein said peripheral device is taken from the group of printers, fax machines, copiers, scanners and combinations thereof.

15. (Currently amended) A vehicle mounted peripheral device station for a vehicle seat adapted to receive a removable headrest comprising:

- a. an adaptor having at least one post; [and]
- b. a peripheral device attached to said adaptor; and

c. [[a securing]] means for securing said peripheral device to said adaptor.

16. (Previously Presented) The vehicle mounted peripheral device station of claim 15, further including a second post attached to said adaptor at a distance from said at least one post.

17. (Currently Amended) The vehicle mounted peripheral device station of claim 16, wherein at least one of said posts is adjustable to modify said distance between said first post and said second post.

18. (Previously Presented) The vehicle mounted peripheral device station of claim 15, wherein said at least one post is pivotable.

19. (Previously Presented) The vehicle mounted peripheral device station of claim 15, wherein at least one of said posts is vertically pivotable.

20. (Currently Amended) A vehicle mounted peripheral device station, comprising:
- a. a vehicle seat adapted to receive a removable headrest;
  - b. a peripheral device;
  - c. an adaptor having at least one post, said at least one post detachably connected to said vehicle seat;
  - d. a support surface connected to [[said peripheral device and]] said adaptor, wherein said support surface is a horizontal plate for receiving said peripheral device; and
  - e. [[a securing]] means for securing said peripheral device to said plate.

21. (Previously Presented) The vehicle mounted peripheral device station of claim 20, wherein said horizontal plate has a plurality of edges.

22. (Previously Presented) The vehicle mounted peripheral device station of claim 21, further including a plurality of side walls attached to said plurality of edges.

23. (Previously Presented) The vehicle mounted peripheral device station of claim 22, wherein said plurality of side walls are spaced to frictionally receive said peripheral device.

24. (Previously Presented) The vehicle mounted peripheral device station of claim 22, wherein at least one of said plurality of side walls is noncontinuous.

25. (Previously Presented) The vehicle mounted peripheral device station of claim 22, wherein said plurality of side walls includes a front wall, a first side wall, a second side wall, and a back wall.

26. (Previously Presented) The vehicle mounted peripheral device station of claim 25, wherein each of said walls has a height and said front wall height is less than said height of each of said side walls and said back wall.

27. (Previously Presented) The vehicle mounted peripheral device station of claim 25, wherein said back wall is noncontinuous.

28. (Previously Cancelled)

29. (Previously Presented) The vehicle mounted peripheral device station of claim 20, wherein the securing means is taken from the group including hook and loop fasteners, straps, adhesives or combinations of one or more of these.

30. (Currently Amended) The vehicle mounted peripheral device station of claim 20, wherein said vehicle seat includes at least one receptacle to receive said at least one post.

31. (Previously Presented) The vehicle mounted peripheral device station of claim 20, wherein said vehicle seat includes a second receptacle to receive a second post.

32. (Previously Presented) The vehicle mounted peripheral device station of claim 20, wherein said peripheral device is taken from the group including printers, fax machines, copiers, scanners and combinations thereof.

33. (Previously Presented) The vehicle mounted peripheral device station of claim 20, further including a second post attached to said adaptor and a distance between said first post and said second post.

34. (Previously Presented) The vehicle mounted peripheral device station of claim-33 wherein at least one of said posts is adjustable to modify said distance between said first post and said second post.

35. (Previously Presented) The vehicle mounted peripheral device station of claim 20, wherein said at least one post is pivotable.

36. (Previously Presented) The vehicle mounted peripheral device station of claim 35, wherein at least one of said posts is vertically pivotable.
